

LEGENDARY PAIRING

Southwest Greens & Nicklaus Design

In golf, it's near impossible to beat a great twosome, and that's what brought Southwest Greens and Nicklaus Design together. For 20 years, the two golf leaders have collaborated in creating custom golf experiences around the world. From personal backyard greens and putting courses to driving ranges and short courses, Nicklaus Design and Southwest Greens have delivered the ultimate in playing experiences. Inspired by the Golden Bear himself, Jack Nicklaus, the Nicklaus Design team crafts greens for your home that Southwest Greens can install across the country with its expert network trained specifically for the task in meeting the high standards of Nicklaus Design.

A specially engineered and patented synthetic grass which emulates real grass performance has earned the Golden Bear Turf trademark and is the turf of choice for home putting greens for many Tour players like Ricki Fowler, Sam Burns and Annika Sorenstam and of course Jack Nicklaus.
